CAREER OBJECTIVE

Motivated and detail-oriented Python Full Stack Developer with hands-on experience in building scalable and secure web applications using Python, Django, React.js, and MySQL. Skilled in developing RESTful APIs, implementing JWT authentication, and designing optimized database structures. Experienced in frontend–backend integration with responsive and user-friendly UI development. Proficient in Git, cloud deployment, and writing clean, maintainable code. Seeking an entry-level Full Stack Developer position to apply technical expertise and contribute to high-quality software solutions.

EDUCATION

Computer scienc(BSC-MPCS) **2020-2023**

Siddartha degree college **CGPA:70%**

Master of computer application **2023-2025**
University arts and science college at Warangal **CGPA:73%**

TECHNICAL SKILLS

- Programming languages : Python, SQL, JavaScript
- Frontend Technologies: HTML, CSS3, Bootstrap, react.js
- Libraries: Pandas, Numpy, React
- Backend Technologies: Django, Django REST Framework(DRF)
- Tools: VS cod, Git, GitHub
- Databases: MySQL (Aiven Cloud Database)
- Data & Other Skills: Pandas, NumPy , DataStructures & Algorithms, Problem Solving ,MS Excel

PROJECTS

1. Personal Portfolio Website – React Application

- Developed a fully responsive portfolio website using React.js to showcase projects and technical skills.
- Improved user engagement by approximately 35% with modern UI/UX design and intuitive navigation.
- Implemented Framer Motion animations and reusable components, reducing code duplication by 40%.
- Achieved 100% mobile responsiveness using Flexbox and Grid layouts.
- Managed version control using Git and GitHub.

Technologies Used:
React.js, JavaScript (ES6+), HTML5, CSS3,Git, GitHub

IMDb-Style Movie Web Application (JavaScript)

Tools: HTML, CSS, javascript

- Designed and developed an IMDb-style movie web application using HTML, CSS, and JavaScript.
- Implemented a responsive and user-friendly UI inspired by real-world entertainment platforms.
- Built dynamic content rendering for movie banners, featured sections, and trailers using JavaScript.
- Created interactive navigation elements such as menus, sliders, and action buttons.
- Applied modern UI/UX design principles to improve visual appeal and user experience.
- Organized and managed project structure for better readability and maintainability.
- Tested the application across different screen sizes to ensure cross-device compatibility.

Note getting and upload app (python full stack)

Tools: python, Django, HTML, CSS, SQL

• Developed a web-based application that allows users to upload, view, and download study notes.

• The application provides a centralized platform for students to share educational resources easily.

• Designed to improve accessibility and organization of notes in digital format.
