CAREER OBJECTIVE

To begin my career as a Junior Engineer at Cornerstone, leveraging my knowledge of Java/.NET, web technologies (HTML, CSS, JavaScript), and frameworks like React/Angular to contribute to building innovative and inclusive software solutions. With a strong foundation in computer science, enthusiasm for learning new technologies, and familiarity with Git and Jenkins, I aim to grow as a collaborative and adaptable engineer while supporting the organization's mission of delivering accessible and user-friendly products.

2023-2025

CGPA:73%

EDUCATION

Master of computer application
University arts and science college at Warangal

TECHNICAL SKILLS

Programming languages : Python, NET, web technologies
 Web development : HTML, CSS , React, JavaScript

Tools : VS codeDatabases : SQL

• Common skills: MS office, Excel, power point, Word.

ACADEMIC PROJECTS

IOT Enabled-smart traffic management system and urban mobility optimization.

This project focuses on developing an IoT-enabled smart traffic management system to improve urban mobility and reduce traffic congestion. The system uses microcontrollers like Arduino or Raspberry Pi along with IR and ultrasonic sensors, ESP8266, cameras, and LEDs to monitor real-time traffic conditions. Using software tools such as Python, C++, Node-RED, Blynk/Things Board, Firebase, and AWS IoT, the system analyses traffic data and dynamically controls traffic signals. It prioritizes emergency vehicles, reduces vehicle waiting time by up to 30%, and provides intelligent route suggestions through a mobile app. The solution is designed to be scalable for smart cities, promoting green transportation and faster emergency response through efficient and automated traffic flow management.

SOFT SKILLS

- Communication
- Problem-solving
- Hard worker
- Time management
- Consistency
- Team leading
- Quick learner
